HSAJET[®] Printheads HP TJ 2.5

HSAJET[®] controllers in combination with HP thermal inkjet technology gives a very high print quality.

The HSAJET[®] printers are based upon the reliable HP TIJ2.5 technology which delivers consistent, high-quality, fast printing, exceptional value, and ease of use. If you're printing in high volumes an ink bulk supply system can give you an even more cost-reductive solution.

HP key-features:

- Cost-effective: No warm-up cycle and no down time
- Easy to use: No special training required to operate and maintain thermal inkjet printers
- Fast: Hundreds of tiny nozzles firing at High frequency allows high-quality printing at high speeds
- Reliable: TIJ is less sensitive to air bubbles in the firing chamber than other printing technologies, avoiding print quality problems and delays caused by trapped air

- · Flexible: Supports a wide variety of media
- High quality: TIJ places smaller drops more accurately, producing consistenly superb image and text quality
- Environmentally safe: With thermal inkjet, there is no need for service technicians qualified to handle volatile solvents, and no noxious fumes
- Lower cost of ownership: A thermal inkjet printer can cost much less than other printing equipment, reducing the market entry cost

Technical Details

PRINTHEADS HR TIJ 2.5

F-type HSAJET printheads for new controllers

Every stall in the new printheads has a switch as well as a fuse. These have been added to avoid damage to the printhead if ink-cartridges are being taken out of the stall during print-mode. If a cartridge is taken out, the power to the printhead is cut off.

For controllers like the MiniTouch only the new 'F'-type printheads can be used:

HSAJET standard type printheads

The printheads mentioned here can be used in combination with these HSAJET controllers: TCU - TCU int - CU - IPC - TIPC - Controller boards
